

The College of Podiatry: Guidance on the Supply of Codeine Phosphate, Co-Codamol and Co-Dydramol

The College of Podiatry advises members with the appropriate annotation (POM-S) that they should only issue a maximum of a three days' supply of the following medicines: codeine phosphate, 30/500 Co-Codamol (pack size 24) and Co-Dydramol. The College also emphasises that members should only obtain these medicines through requests to the pharmacist (i.e. via a signed order) and that individual supplies should not be held by members. The 'POM-S' certification requires a College of Podiatry recognised update every three years for members.
